

MOTORCYCLE FUN RIDE BENEFIT

JUNE 4, 2024

IOWA WATER ENVIRONMENT ASSOCIATION'S ANNUAL CONFERENCE

According to UNICEF, more than 1.1 billion people worldwide don't have access to safe drinking water. Another 2.6 billion lack adequate sanitation. The result is devastating. Every day, 5,000 people who share our planet die from water-related illnesses, nearly 2 million each year, and the vast majority of these are children. Epidemics of cholera, dysentery and Hepatitis are common, diseases that can be traced directly to water or sanitation. Water is arguably the greatest humanitarian crisis of our time. The British Medical Journal reports that medical experts voted sewage disposal and clean water the most important medical advancement since 1840. Ride today to save lives tomorrow.
